

AC HYDRAULIC
NO COMPROMISE

AGRICULTURE

Powerful lifting solutions for tractors and agricultural machinery.

MADE IN DENMARK 

STRONG LIFTS FOR AGRICULTURE

AC Hydraulic develops equipment for the heaviest tasks in agriculture. Our products are designed for tractors and large agricultural machines – so you can work faster, safer, and more efficiently.

We offer everything from wheel trolleys and jacks to inground lifts and accessories that make it easy to adapt the equipment to your needs. Whether you service machines in the field or in the workshop, you'll get reliable solutions built to last for many years.

The result is clear – reduced physical strain, higher safety, and maximum uptime for your machinery.

WHEEL TROLLEYS

Wheel trolleys from AC Hydraulic are essential in any workshop handling agricultural machinery. Unique features make it possible for a single operator to handle even the largest agricultural wheels in the world. Our wheel trolleys offer superior ergonomics, safety, and manoeuvrability compared to other products on the market. They are developed with a wide range of intelligent functions that make operation easier, safer, and more efficient.

AIR HYDRAULIC JACKS

Our air hydraulic jacks are built for intensive use and deliver extremely stable heavy lifting. This includes all types of work on agricultural and construction machinery, trailers, and other heavy-duty applications with high ground clearance. Built-in safety features ensure optimal safety during lifting and lowering, while accessory extensions provide broad usability.

HYDRAULIC JACKS

Our hydraulic jacks for agricultural and construction machinery feature wide bases and high-strength steel construction. Fitted with quick-lift pedal for easy reach of lifting point, and all jacks provide precise and safe control during lowering. Combined with carefully integrated safety features, the hydraulic jacks are the ideal choice for fast and easy operation – both in the field and in the workshop.

PRESSES

Presses from AC Hydraulic are indispensable in any workshop working with repair and adjustment of heavy components. Our presses are designed to deliver precision, power, and control – even for demanding, high-load tasks. They combine robust construction with user-friendly details that make work faster, safer, and more efficient.

HEAVY DUTY INGROUND LIFTS

Heavy Duty Inground Lifts from AC Hydraulic revolutionize how agricultural machinery of all types, sizes, and shapes are serviced. The flexible design allows lifts with 3 or more columns to be divided into groups and used independently. This gives you total freedom to service a continuous flow of different machines. When not in use, the lift leaves the workshop floor clear, and since the cover can withstand 7 tons, tractors and other machines can safely drive over it.

WHEEL TROLLEYS

ONE-MAN LIFTING OF EVEN THE LARGEST WHEELS

Wheel trolleys from AC Hydraulic make it easy and safe to handle even the largest agricultural wheels. With a focus on ergonomics, precision, and safety, one technician can perform the job alone – without heavy lifting or risk.

WHEEL TROLLEYS – REQUIRES ONLY ONE OPERATOR

- Optimal manoeuvrability – two ergonomic handles and robust wheels ensure full control
- Effortless handling – hydraulic pump enables easy lifting and lowering of heavy wheels
- Precise mounting – easy rotation for quick bolt alignment (NT models)
- Maximum safety – space for securing strap keeps the wheel stable during work
- Easy access – free space for wheel nuts without obstructing posts or brackets
- Two swivel castors with brake (NT-B model)

FASTER SERVICE, HIGHER SAFETY, AND LESS PHYSICAL STRAIN

AIR HYDRAULIC JACKS

STABLE HEAVY LIFTING – DAY AFTER DAY

Our Air Hydraulic Jacks are designed for intensive agricultural use. They deliver extremely stable lifting of even the largest machines, making the job quick, safe, and easy.

AIR HYDRAULIC JACKS – LIFT EVEN THE HEAVIEST AGRICULTURAL MACHINERY

- Extreme stability – safe lifting of all types of agricultural and construction machinery
- Easy operation – ergonomic handle with push-button control
- Long service life – top-quality cylinder and steel frame
- Optimal safety – built-in safety valve and dead man's release
- Flexible use – supplied with extensions (except model 50-3H)
- Easy to handle – compact design allows quick movement

MAXIMUM RELIABILITY AND SAFETY – YEAR AFTER YEAR

HYDRAULIC JACKS

WHEN ONLY THE STRONGEST IS GOOD ENOUGH

Heavy Duty Hydraulic Jacks from AC Hydraulic are built for the toughest jobs. With high capacity and robust construction, they deliver reliable performance in every situation.

HYDRAULIC JACKS - LIFT EVEN THE HEAVIEST AGRICULTURAL MACHINERY

- Extreme stability – heavy lifting without compromise
- Long lifetime – hard-chromed cylinder and reinforced steel frame
- Maximum safety – safety valve and dead man's release always protect the operator

SAFE LIFTING EQUIPMENT BUILT FOR INTENSIVE USE

PRESSES

FOR THE MOST DEMANDING TASKS

AC Hydraulic offers a wide range of hand-operated, air-hydraulic, and electro-hydraulic presses. We design and manufacture our press solutions for the most demanding applications. Each press handles everything from precise positioning to high-load operations – so you can work faster, safer, and with full control.

PRESSES – YOUR PARTNER IN PRECISION AND POWER

- Protects components with even and controlled pressure
- Ideal for both repair and manufacturing
- A long-term investment with market-leading warranties
- Safety, flexibility, and maximum precision – every single day

A TOOL PREFERRED BY PROFESSIONAL WORKSHOPS WORLDWIDE

HEAVY DUTY INGROUND LIFTS

MAXIMUM FLEXIBILITY AND SPACE UTILIZATION

Our Inground Lifts have revolutionized how workshops service agricultural machinery. Their flexible design and high capacity make it possible to handle even the largest machines with complete freedom and safety.

HEAVY DUTY INGROUND LIFTS – YOUR SAFE LIFTING SOLUTION

- Full flexibility – service all machine types with up to 8 columns of 15 tons each
- Wireless remote control – maximum freedom of movement and safety
- Optimal space utilization – robust roller shutter cover keeps floor level for other tasks
- Automatic positioning (optional) – preset the lift for the next vehicle
- Strong cover – withstands up to 7 tons, allowing tractors to pass safely

A WORKSHOP WITH TOTAL FLEXIBILITY, HIGHER EFFICIENCY, AND BETTER SPACE UTILIZATION

AC HYDRAULIC LIFTS AGRICULTURE

WHEN YOU CHOOSE AC HYDRAULIC, YOU GET MORE THAN LIFTING EQUIPMENT.

You get solutions specifically developed for the challenges faced in agriculture – focusing on high performance, long service life, and optimal safety. Scan the QR code to explore more.

MORE TIME IN THE FIELD, FEWER BREAKDOWNS, AND A SAFER WORKING ENVIRONMENT

Top safety – built-in safety features in all products

One-man operation – handle even the largest machines without heavy lifting

Efficient service – faster workflows and less downtime

Flexible solutions – products and accessories for all types of machinery

Long lifespan – durable quality that withstands years of heavy use

Danish design and manufacturing – known for precision and uncompromising quality

Spare parts – ready for delivery, easy to install, and designed to extend equipment life

Warranty – all products covered by a 10-year warranty on frame, chassis, and steel structures, and 3 years on the hydraulic system. Electrical components are covered by a 1-year warranty.

OUR PRODUCTS DELIVER HIGH PERFORMANCE AND QUALITY – AND OUR WARRANTY REFLECTS THAT.
